ABOUT ME

Passionate computer science 2nd year student eager to learn and innovate.

Committed to pushing boundaries and seeking collaborative opportunities as a Full-stack developer with knowledge in various fields.

SKILLS

- Python | GO | C# | Java | C | JavaScript | TypeScript | React | HTML | CSS | Git | Linux.
- Skilled primarily in backend technologies, data visualization, machine learning libraries, web scraping, databases, and APIs, complemented by knowledge of various front-end frameworks.

SOFT SKILLS

- Self motivated
- Independent learner with strong discipline
- Always striving to gain more knowledge
- Problem solving
- Team player
- Hard working and dedicated
- Reliable
- Lifelong computer enthusiast and gamer
- Creative and flexible to new ideas, tech and tools
- Paying attention to small details

PROJECTS

Real time chat application

- Real-time chat room web application built using Python, Flask and Socket.IO. It allows users to create and join chat rooms where they can exchange messages in real-time.

12-bit Assembler

- Developed a 12-bit assembler in C from scratch, demonstrating advanced programming skills and a deep understanding of low-level computer architecture.
- Strong debugging and testing to ensure the assembler's accuracy and reliability.

Text Summarization

- Streamlines and automates the process of summarizing large blocks of text.
- Utilizes Python, React, and the Hugging Face Transformers library.

Tasks

- Responsive and efficient task management app developed with Next.js, React, Prisma, and MongoDB.

Weather Forecast

- Built with Next.js, Tailwind CSS, and TypeScript, this Weather App allows users to check the weather forecast for various cities.

PROFESSIONAL EXPERIENCE

N.A. construction company

SEP 2019 - MAR 2023

Executive Assistant to CEO

- Creating financial reports and analyzing the financial situation of the business.
- Experience in financial analysis, budgeting and forecasting.
- Proven ability to manage multiple projects at the same time.
- Excellent communication and organizational skills.
- Development and implementation of successful systems for the organizational purpose.

EDUCATION

Computer Science Student - The Open University

Currently

- Proficient in programming languages
- Solid understanding of data structures and algorithms.
- Possess a strong foundation in mathematics

Marketing and Advertising course - Ono Academic College

High school - Yuvalim (Bagrut GPA 102)

Full matriculation certificate with honors - 5 units of computer major, 5 units of business management.

NATIONAL SERVICE

Clalit - administration

SEP 2015 - SEP 2016

LANGUAGES

* English * Hebrew
