Committed to pushing boundaries and seeking collaborative opportunities as a Full-stack developer with knowledge in various fields.

SKILLS

- Python | C | Java | C# | HTML | CSS | REACT | JAVASCRIPT | TYPESCRIPT | GO | GIT | LINUX
- Skilled in diverse front-end frameworks, data visualization, machine learning libraries, backend technologies, web scraping, databases and APIs.

SOFT SKILLS

- Self motivated
- Independent learner with strong discipline
- Always striving to gain more knowledge
- Problem solving
- Team player
- Hard working and dedicated
- Reliable
- Lifelong computer enthusiast and gamer
- Creative and flexible to new ideas, tech and tools
- Paying attention to small details

PROJECTS

12-bit Assembler
- Developed a 12-bit assembler in C from scratch, demonstrating advanced programming skills and a deep understanding of low-level computer architecture.
- Strong debugging and testing to ensure the assembler's accuracy and reliability.

Real time chat application
- real-time chat room web application built using Python, Flask and Socket.IO. It allows users to create and join chat rooms where they can exchange messages in real-time.

Text Summarization
- streamlines and automates the process of summarizing large blocks of text.
- utilizes Python, React, and the Hugging Face Transformers library.

Tasks
- responsive and efficient task management app developed with Next.js, React, Prisma, and MongoDB.

Weather Forecast
- Built with Next.js, Tailwind CSS, and TypeScript, this Weather App allows users to check the weather forecast for various cities.
